

AI Specialist

Full Time Permanent | Internship

Key Responsibilities

- Explore the latest AI tools and technologies, and evaluate how they can be applied to real business use cases.
- Support the team in prototyping AI-driven solutions that address real-life business problems using structured and unstructured data.
- Work with open-source and local LLMs, prompt engineering techniques, and AI orchestration frameworks to build practical applications.
- Collaborate with engineers and stakeholders to translate business needs into effective AI workflows and solutions.
- Assess AI application quality, safety, and reliability through testing, evaluation, and guardrails.

Requirements

- Bachelor's or Master's degree in Computer Science, AI/ML (Machine Learning), Data Science, or a related field. Internship opportunities are also available for current students in related disciplines.
- Experience building applications with ML models (e.g., Open source LLMs, Speech-to-text models) and AI orchestration frameworks (e.g., LangChain, LlamaIndex).
- Familiarity with Agentic AI development and safety concepts, including tool use, Model Context Protocol (MCP), Skills, and guardrails.
- Experience deploying local LLMs and an understanding of AI model internals (e.g., embeddings, KV cache, paged attention, MoE).
- Strong proficiency in Python and Knowledge of RESTful API development, microservices, and backend technologies (e.g., FastAPI, Flask, Django).
- Experience handling structured and unstructured data from databases (JSON, MSSQL, MySQL, etc.).
- Ability to transition AI prototypes into functional, scalable production systems in a fast-paced, collaborative environment.

What We Offer

- Attractive remuneration and benefits packages.
- Great learning and career development opportunities.
- Interesting and meaningful work that creates impacts.

How to Apply

Send your application to jobs@mobigator.com and mention the role title **AI Specialist**.
