

## Machine Learning Developer

Full Time Permanent | Internship

### Key Responsibilities

- Develop AI agents and AI-driven solutions leveraging structured and unstructured data to solve specific real-life business problems.
- Deploy, manage, and optimize open-source and local LLMs for production using inference engines (e.g., vLLM, SGLang, llama.cpp).
- Implement APIs or pipelines to automate AI-driven workflows and agentic tasks.
- Design and optimize SQL queries for efficient data retrieval.
- Work with stakeholders to define business logic and translate AI capabilities into functional production systems.
- Conduct advanced prompt engineering, performance validation, and continuous evaluation of AI applications.
- Ensure application safety and reliability by implementing guardrails and effective agentic tool use.

### Requirements

- Bachelor's or Master's degree in Computer Science, AI/ML (Machine Learning), Data Science, or a related field. Internship opportunities are also available for current students in related disciplines.
- Experience building applications with ML models (e.g., Open source LLMs, Speech-to-text models) and AI orchestration frameworks (e.g., LangChain, LlamaIndex).
- Familiarity with Agentic AI development and safety concepts, including tool use, Model Context Protocol (MCP), Skills, and guardrails.
- Experience deploying local LLMs and an understanding of AI model internals (e.g., embeddings, KV cache, paged attention, MoE).
- Strong proficiency in Python and Knowledge of RESTful API development, microservices, and backend technologies (e.g., FastAPI, Flask, Django).
- Experience handling structured and unstructured data from databases (JSON, MSSQL, MySQL, etc.).
- Ability to transition AI prototypes into functional, scalable production systems in a fast-paced, collaborative environment.

### What We Offer

- Attractive remuneration and benefits packages.
- Great learning and career development opportunities.
- Interesting and meaningful work that creates impacts.

### How to Apply

Send your application to [jobs@mobigator.com](mailto:jobs@mobigator.com) and mention the role title **Machine Learning Developer**.
